This print hangs in the Downtown Technology Center in Columbus, OH and is approximately 36 inches by 122 inches as a canvas wrap. It features the Rock and Roll Hall of Fame, Key Tower, Terminal Tower, the Science Museum, the Mather Museum and the Cleveland Browns Stadium.

The image is a panoramic stitch with multiple exposures taken at each shot. Each of those images is blended together and then merged in post production to create a seamless view of the skyline as seen on the pier.
